

PLYWOOD BOARD

NON-SLIPPING BOARD

PLASTIC COATED

Standard, MIXED (TROPICAL TIMBER / PINE) PLYWOOD BOARD is coated in both faces with a phenolic film. One side with hexagonal relief (240 g) and the other smooth (120 g), in dark BROWN COLOR.

The surface is characterised by a high degree of wear resistance, has a good visual design and is resistant to chemicals and moisture.

The PLYWOOD BOARD gluing is Class III, according to UNE EN 314 STANDARD.
